Date: 02-10-2021

REPORT

Name of the programme: Pharmacovigilance (PV)

Duration: 17-09-2021 to 23-09-2021

Resource person Details: Dr.A.Pramod kumar,M.Pharm,Ph.D

Senior Manager,Bioclinica,Mysure

Objectives:

1. Understand drug safety, history and evolution of Pharmacovigilance, the role of health authorities and their guidelines.
2. Processing of individual case safety reports(ICSR)
3. Data bases used for case processing

Learning objectives:

1. Define PV and its history.
2. Classify ICSRs and complete reporting forms.
3. Understand; determine seriousness, expectedness and causality
4. Process cases in safety data base.

This programme was informative to the students and their feedback was positive.

Dr. Adepu Ramesh , Principal of Vikas college of pharmaceutical sciences thanked the resource person and participants for making the programme successful.

PRINCIPAL

About Us

Vikas College of Pharmaceutical Sciences is located at Rayanigudem, Suryapet district, rural South Telangana. The institution was started in 2004-05 by VC Educational Society, Secunderabad to impart quality pharmacy education to the students from rural areas and equip them with the necessary competencies to meet the growing global demand in Pharmaceutical industry, academia, research, and in patient care areas.

The college is approved by All India Council for Technical Education (AICTE), Pharmacy Council of India, New Delhi and affiliated to Jawaharlal Nehru Technological University (JNTU), Hyderabad.

The institution offers Bachelors degree in Pharmacy (B.Pharm) followed by Master's degree in Pharmacy (M.Pharm) and Pharm. D (Doctor of Pharmacy) Programme (Six years integrated course) Post Baccalaureate (P.B).

About Pharmacy Practice

The department of Pharmacy Practice, was established in the year 2011-12 with an intake of 21 in Doctor of Pharmacy. This intake is increased to 30 by A.Y 2012-13. The Pharmacy Practice department is committed to delivering quality of education for all around development of students to meet the changing requirements of pharmaceutical industry and country.

Programme Objectives

Objectives:

- Understand drug safety, history and evolution of Pharmacovigilance, the role of health authorities and their guidelines.
- Processing of individual case safety reports (ICSR)
- Data bases used for case processing

Learning objectives:

1. Define PV and its history.
2. Classify ICSRs and complete reporting forms.
3. Understand; determine seriousness, expectedness and causality
4. Process cases in safety data base.

About Us

Vikas College of Pharmaceutical Sciences is located at Rayanigudem, Suryapet district, rural SouthTelangana. The institution was started in 2004 -05 by VVC Educational Society, Secunderabad to impart quality pharmacy education to the students from rural areas and equip them with the necessary competencies to meet the growing global demand in Pharmaceutical industry, academia, research, and in patient care areas. The college is approved by All India Council for Technical Education (AICTE), Pharmacy Council of India, New Delhi and affiliated to Jawaharlal Nehru Technological University (JNTU), Hyderabad. The institution offers Bachelors degree in Pharmacy (B.Pharm) followed by Master's degree in Pharmacy (M.Pharm) and Pharm. D (Doctor of Pharmacy) Programme (Six years integrated course) Post Baccalaureate (PB).

About Pharmaceutical Chemistry

The department of Pharmaceutical Chemistry, was established in the year 2010-11 with an intake of 30 in Master of Pharmacy. This intake is increased to 45 by A.Y 2011-12. The Pharmaceutical Chemistry department is committed to deliver quality of education for all around development of students to meet the changing requirements of pharmaceutical industry and country.

Aim of the workshop

Drug discovery and development is a time and resource consuming process. Computer aided drug design help expedite the process and facilitates identification, hit-to-lead selection, optimize Pharmacokinetics and Pharmacodynamics. The main aim of the workshop is to foster an understanding of the basic concepts and application of computer aided drug discovery technology.

Programme Objectives

Computational screening of databases has become increasingly popular in the pharmaceutical research. Virtual screening uses computer based methods to discover new ligands on the basis of biological structures. Virtual screening is divided into structural based screening (docking) and screening using active compounds as templates (ligand based virtual screening). Ligand based screening techniques mainly focus on comparing molecular similarity analyses of compounds with known and unknown moiety, regardless of the methods of the used algorithm. Docking is a computational tool of structure based drug design to predict protein ligand interaction geometries and binding affinities

Date:30-06-2020

Report

Name of the programme: DOCKING-VIRTUAL TOOL FOR DRUG DISCOVERY

Duration: 19-06-2020 to 26-06-2020

Resource person Details: Dr. D. Ravisankar., M Pharm., Ph.D.,

Assistant Professor,

Acharya Nagarjuna University, Guntur-A.P

Objectives:

1. Computational screening of databases has become increasingly popular in the pharmaceutical research.
2. Virtual screening uses computer based methods to discover new ligands on the basis of biological structures.
3. Virtual screening is divided into structural based screening (docking) and screening using active compounds as templates (ligand based virtual screening).
4. Ligand based screening techniques mainly focus on comparing molecular similarity analyses of compounds with known and unknown moiety, regardless of the methods of the used algorithm.
5. Docking is a computational tool of structure based drug design to predict protein ligand interaction geometries and binding affinities.

This programme was informative to the students and their feedback was positive.

Dr. Adepu Ramesh , Principal of Vikas college of pharmaceutical sciences thanked the resource person and participants for making the programme successful.

Report

**Name of the Programme: TUMOUR SPECIFIC DRUG DELIVERY:NOVEL APPROACHES
AUTOMATED DRUG DELIVERY SYSTEM**

Duration:12-03-2021 TO 17-03-2021

Resource person: Dr.P.Sravan,M.Pharm,Ph.D

Associate Professor,

Vaageswari College of Pharmacy, Karimnagar

Objectives:

1. Targeted drug delivery by conjugating with a biocompatible polymer allowing better solubility, lower toxicity, and prolonged release forms the basis of cancer medicine.
2. In the past few decades unprecedented endeavors have been made in the development of nonmaterial's, such as quantum dots, nanotubes, nanorods, and other variants composed of metals, semiconductors, carbon, natural and synthetic polymers and lipids, for use in effective therapeutic drug delivery vehicles.
3. There are two modes of drug delivery of nanoparticles: passive targeting and active targeting. In passive targeting, the accumulation of the nanoparticles at the cancerous site is dependent on the size of the nanoparticles.
4. Leaky vasculature allows extravasation of the nanoparticles and poor lymphatic drainage retains it at the tissue (EPR).

This programme was informative to the students and their feedback was positive.

Dr. Adepu Ramesh, Principal of Vikas college of pharmaceutical sciences thanked the resource person and participants for making the programme successful.

Report

Name of the programme: INSIGHTS INTO DRUG DISCOVERY AND DEVELOPMENT

Duration: 25-11-2019 to 30-11-2019

Recourse person details: Dr. J. Ramesh., M Pharm., Ph.D.,

Associate Professor,

Vikas Institute of Pharmaceutical Sciences, Jangaon

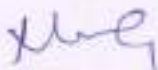

Objectives:

1. This workshop is an information packed resource which will also focus on emerging trends in drug discovery and development, imparting knowledge about intellectual property rights, diving into success stories of Pharma and Biotech start-ups while throwing light on the modes of securing funding by the industries involved in drug discovery and development.
2. These aspects would help students understand this industry and pave a path for building their career in this domain.

This programme was informative to the students and their feedback was positive.

Dr. Adepu Ramesh, Principal of Vikas college of pharmaceutical sciences thanked the resource person and participants for making the programme successful.

Duration: 15-03-2020 to 18-03-2020

Recourse person details: Dr.T.Ashok Kumar ,M.Pharm,Ph.D

Professor

Objectives:

1. The primal discipline from which pharmacy has developed can be considered as Pharmacognosy. This review defines Pharmacognosy while reflecting on the latest development and discourse about its justifiability in the educational system in pharmaceutical faculties and the history of development of new drugs under the influence of Pharmacognosy.
2. The article defines the status quo of the Pharmacognosy area, or more precisely its parts (biology, chemistry, production, and technology) and discusses their connections.
3. It underlines the legitimacy of application of natural drugs in therapy, which is undeniable, and proves that whether a new drug was prepared either synthetically or isolated from a natural source is not important.
4. The overview follows the basic requirements of Pharmacognosy, especially its methodology (usage of faster and more effective phyto-analytical methods, reverse pharmacology, and reverse Pharmacognosy, in silico methods).

WORKSHOP
ON
HPTLC: TECHNIQUE AND PHARMA APPLICATIONS
06-02-2018 to 13-02-2018

About Us

Vikas College of Pharmaceutical Sciences is located at Rayanigudem, Suryapet district, rural South Telangana. The institution was started in 2004-05 by VC Educational Society, Secunderabad to impart quality pharmacy education to the students from rural areas and equip them with the necessary competencies to meet the growing global demand in Pharmaceutical industry, academia, research, and in patient care areas.

The college is approved by All India Council for Technical Education (AICTE), Pharmacy Council of India, New Delhi and affiliated to Jawaharlal Nehru Technological University (JNTU), Hyderabad.

The institution offers Bachelors degree in Pharmacy (B.Pharm) followed by Master's degree in Pharmacy (M.Pharm) and Pharm. D (Doctor of Pharmacy) Programme (Six years integrated course) Post Baccalaureate (P.B).

About Pharmaceutical Analysis

The department of Pharmaceutical Chemistry, was established in the year 2009-10 with an intake of 10 in Master of Pharmacy. This intake is increased to 18 by A.Y 2010-11. The Pharmaceutical Chemistry department is committed to delivering quality of education for all around development of students to meet the changing requirements of pharmaceutical industry and country.

Programme Objectives

- ✓ Ability to analyze crude samples containing multi-components. The separation process is easy to follow especially with colored compounds. Several samples can be separated parallel to each other on the same plate resulting in a high output, time saving, and a rapid low cost analysis.
- ✓ The Choice of solvents for the HPTLC development is wide as the mobile phases are fully evaporated before the detection step. Two dimensional separations are easy to perform. Stability during chromatography should be tested using two dimensional development Specific and sensitive colour reagents can be used to detect separated spots.

WORKSHOP
ON
NEW APPROACHES FOR TARGETING TO TREAT TUBERCULOSIS
26th-30th April 2019

Vikas College of Pharmaceutical Sciences

(Approved by AICTE, New Delhi and PCI, Affiliated to JNTUH)

Rayanigudem, Suryapet-508376.

Department of Pharmacology

Resource Person:

Dr. P. Poli Reddy,

Associate Professor,

Nalanda College of Pharmacy, Nalgonda

Date: 06-05-2019

Report

Name of the programme: NEW APPROACHES FOR TARGETING TO TREAT TUBERCULOSIS

Duration: 26-04-2019 to 30-04-2019

Resource person: Dr.P.Polireddy,M.Pharm,Ph.D

Associate Professor,

Nalanda College of Pharmacy, Nalgonda

Objectives:

1. Enlisting political, academic and professional support to implement the PAL strategy in countries. Estimating the epidemiological and social burden of respiratory diseases.
2. Assessing the capabilities of the health infrastructure to implement the PAL strategy.
3. Developing standard clinical guidelines for improving the case-management of respiratory diseases at PHC outpatient services and first-referral (or district) hospitals.
4. Designing communication messages as an essential part of the case-management of patients with respiratory symptoms.
5. Formulating an information system to monitor and evaluate the implementation of the PAL strategy. Developing materials for training on the clinical guidelines.
6. Testing the implementation of the clinical guidelines and the information system in a pilot area.

This programme was informative to the students and their feedback was positive.

Dr. Adepu Ramesh , Principal of Vikas college of pharmaceutical sciences thanked the resource person and participants for making the programme successful

**NATIONAL SEMINAR
ON
ADVANCES IN PHARMACEUTICAL DRUG DELIVERY AND TECHNOLOGY
13th-16th July 2017**

Vikas College of Pharmaceutical Sciences

(Approved by AICTE, New Delhi and PCI, Affiliated to JNTUH)
Rayanigudem, Suryapet-508376.

Department of Pharmaceutics

Resource Person:

Dr. B. Ramesh.,

Associate Professor

Department of Pharmaceutics,

GITAM University, Hyderabad

Date: 21-07-2017

Report

Name of the programme: ADVANCES IN PHARMACEUTICAL DRUG DELIVERY AND TECHNOLOGY

Duration: 13-07-2017 to 16-07-2017

Resource person Details: Dr. B. Ramesh, M. Pharm, Ph.D.

Associate Professor

Department of Pharmaceutics,

GITAM University, Hyderabad

Objectives:

1. understand the principle involved in various formulation of advanced drug delivery systems
2. understand various approaches for development of novel drug delivery systems
3. understand various technologies used in pharmaceutical industries
4. understand the formulation and evaluation of novel drug delivery system
5. Understand the criteria for selection of drugs and polymers for the development of novel drug delivery systems, their formulation and evaluation.

Learning objectives:

1. know various considerations in development of advanced drug delivery system
2. know the pilot plant scale up techniques
3. know the formulation aspects of different advanced drug delivery systems
4. know the various new technologies used in the pharmaceutical industries
5. Formulation and evaluation of novel drug delivery system

This programme was informative to the students and their feedback was positive.

Dr. Adepu Ramesh , Principal of Vikas college of pharmaceutical sciences thanked the resource person and participants for making the programme successful.

Date: 02-10-2021

REPORT

Name of the programme: Pharmacovigilance (PV)

Duration: 17-09-2021 to 23-09-2021

Resource person Details: Dr.A.Pramod kumar,M.Pharm,Ph.D

Senior Manager,Bioclinica,Mysure

Objectives:

1. Understand drug safety, history and evolution of Pharmacovigilance, the role of health authorities and their guidelines.
2. Processing of individual case safety reports(ICSR)
3. Data bases used for case processing

Learning objectives:

1. Define PV and its history.
2. Classify ICSRs and complete reporting forms.
3. Understand; determine seriousness, expectedness and causality
4. Process cases in safety data base.

This programme was informative to the students and their feedback was positive.

Dr. Adepu Ramesh , Principal of Vikas college of pharmaceutical sciences thanked the resource person and participants for making the programme successful.

About Us

Vikas College of Pharmaceutical Sciences is located at Rayanigudem, Suryapet district, rural SouthTelangana. The institution was started in 2004 -05 by VVC Educational Society, Secunderabad to impart quality pharmacy education to the students from rural areas and equip them with the necessary competencies to meet the growing global demand in Pharmaceutical industry, academia, research, and in patient care areas. The college is approved by All India Council for Technical Education (AICTE), Pharmacy Council of India, New Delhi and affiliated to Jawaharlal Nehru Technological University (JNTU), Hyderabad. The institution offers Bachelors degree in Pharmacy (B.Pharm) followed by Master's degree in Pharmacy (M.Pharm) and Pharm. D (Doctor of Pharmacy) Programme (Six years integrated course) Post Baccalaureate (PB).

About Pharmaceutical Chemistry

The department of Pharmaceutical Chemistry, was established in the year 2010-11 with an intake of 30 in Master of Pharmacy. This intake is increased to 45 by A.Y 2011-12. The Pharmaceutical Chemistry department is committed to deliver quality of education for all around development of students to meet the changing requirements of pharmaceutical industry and country.

Aim of the workshop

Drug discovery and development is a time and resource consuming process. Computer aided drug design help expedite the process and facilitates identification, hit-to-lead selection, optimize Pharmacokinetics and Pharmacodynamics. The main aim of the workshop is to foster an understanding of the basic concepts and application of computer aided drug discovery technology.

Programme Objectives

Computational screening of databases has become increasingly popular in the pharmaceutical research. Virtual screening uses computer based methods to discover new ligands on the basis of biological structures. Virtual screening is divided into structural based screening (docking) and screening using active compounds as templates (ligand based virtual screening). Ligand based screening techniques mainly focus on comparing molecular similarity analyses of compounds with known and unknown moiety, regardless of the methods of the used algorithm. Docking is a computational tool of structure based drug design to predict protein ligand interaction geometries and binding affinities

Report

Name of the programme: ADVANCED PHARMACOGNOSY CHALLENGES AND INNOVATIONS

Duration: 15-03-2020 to 18-03-2020

Recourse person details: Dr.T.Ashok Kumar ,M.Pharm,Ph.D

Professor

Objectives:

1. The primal discipline from which pharmacy has developed can be considered as Pharmacognosy. This review defines Pharmacognosy while reflecting on the latest development and discourse about its justifiability in the educational system in pharmaceutical faculties and the history of development of new drugs under the influence of Pharmacognosy.
2. The article defines the status quo of the Pharmacognosy area, or more precisely its parts (biology, chemistry, production, and technology) and discusses their connections.
3. It underlines the legitimacy of application of natural drugs in therapy, which is undeniable, and proves that whether a new drug was prepared either synthetically or isolated from a natural source is not important.
4. The overview follows the basic requirements of Pharmacognosy, especially its methodology (usage of faster and more effective phyto-analytical methods, reverse pharmacology, and reverse Pharmacognosy, in silico methods).
